

Information Science (InfoSci) 4-Year Plan Template

Name*: _____ UID*: _____ Email address*: _____ Phone No.*: _____

Current Major*: _____ Dual Degree (if any): _____ Double Major (if any): _____ Minor (if any): _____
(* required fields)

The four-year plan is a binding agreement between the student and the InfoSci program. If the student revises the four year plan after the major is changed, it is his/her responsibility to provide the advisor with an updated version for review and approval.

****Please note: Changing or not following the four year plan could delay graduation.**

Instructions for completing the 4-Year plan:

1. Please start with your current semester (do not list past semesters).
2. Include semester and year for each box. Example: Fall 2016
3. Include total semester credits for each box.
4. Include all **remaining** CORE or General Education requirements.
5. If you list courses for the winter or summer, please list the course and the semester. Example: Math115-winter 2017
6. You must include all **remaining** benchmark courses before listing any major courses.
7. Ten InfoSci core courses and five major electives are required for your major. Please list the core courses by full course number (e.g., “INST 311”), and list the INST major elective as “INST Elect. #1” - “INST Elect. #5”. (We require that you list electives this way because future semesters are not available on Testudo.)
8. The total number of credits must be 120 (earned and what is on the plan).
9. Once you complete the template, you are required to upload the document on our website. The advisor will review the plan and email you if revisions are needed or if your plan is approved. *****Please note that the form must be submitted as a pdf. Other formats will not be viewed and will delay the change of major process.**

Year 1	Fall 20	Cr	Spring 20	Cr	Winter/SummerI/SummerII 20	Cr
Benchmark to be met: MATH115, and PSYC100						
	Total		Total		Total	
Year 2	Fall 20	Cr	Spring 20	Cr	Winter/SummerI/SummerII 20	Cr
Benchmark to be met: STAT100, INST126 (or CMSC106, CMSC122), and INST201
