

INST 354 - DECISION MAKING FOR INFORMATION SCIENCE

Spring 2019

ONLINE

Instructor: Dr. Christopher Antoun

E-mail: antoun@umd.edu

Office: 4105F Hornbake, South Wing

Office Hours: Thursdays, 2:30– 4:30 PM. Online sign-up form: <https://goo.gl/U5v7sC>

Teaching Assistant (TA): Xiaoyi Deng

E-mail: xdeng01@umd.edu

A critical determinant of success for individuals and organizations is making good decisions. But why is it that we don't always make rational and logical choices? How can we improve the quality of our judgments and choices? To address these questions, the course will review:

- strategies for making rational choices;
- the psychology of judgment and decision making, including the roles of thinking strategies known as heuristics; and
- quantitative techniques for decision making, including optimization/linear programming and classification tree models.

Learning Outcomes

After completing this course you will be able to:

- Use decision analysis to facilitate rational choice
- Recognize different descriptive judgment and decision-making strategies
- Solve an optimization problem
- Use classification models to inform decision making

The Pre-requisites for this course are: MATH 115 Precalculus, AND STAT 100 Elementary Statistics and Probability, AND PSYC 100 Introduction to Psychology, AND INST 314 Statistics for Information Science.

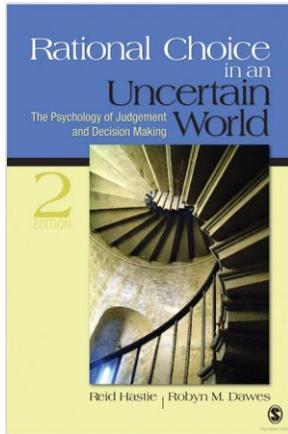

Course Format

This course is fully online. All readings, assignments, and lectures will be posted on Canvas. I have found that many students like the convenience and flexibility of online learning. However, it requires you to be more self-motivated and self-directed than a face-to-face class. I recommend setting calendar reminders for the different assignments and blocking off large chunks of time on your calendar during the weeks that exercises are due.

Required Resources

The following resources are necessary for you to successfully complete this course.

- The course website, www.elms.umd.edu
- One text book:

Reid Hastie & Robyn Dawes, *Rational Choice in an Uncertain World*, 2nd Edition. Sage. Electronic version for sale here:

<https://us.sagepub.com/en-us/nam/rational-choice-in-an-uncertain-world/book231783>

(Hereafter **RC**)

Completing the required readings is essential to understanding the course material.

Required Software

The following software is necessary for you to successfully complete the course.

Microsoft Excel. For Macintosh users it is available through the university's TERPware website (<https://terpware.umd.edu>).

R software. It is free and available online (<https://www.r-project.org/>). You may want to use R Studio (the free version), which is an integrated development environment for R (<https://www.rstudio.com/>).

My Teaching Philosophy

To understand how I view my role as a teacher, please read my statement of teaching philosophy: <https://sites.google.com/site/chrisantoun/teaching-philosophy>

Communication with Instructor

If you plan to attend office hours, please let me know by signing up for a time using this form: <https://goo.gl/U5v7sC>.

If you have questions about the materials, you are welcome to send me an email (antoun@umd.edu). I will try to respond within 48 hours. If you don't receive a response within 48 hours, feel free to send a follow-up email.

If you know in advance that you can't meet an assignment deadline, please let me know. Extensions will be granted under certain circumstances (personal problem, illness).

Campus Policies

Please visit <http://www.ugst.umd.edu/courserelatedpolicies.html> for the Office of Undergraduate Studies' full list of course related policies and follow up with me if you have questions. It is our shared responsibility to abide by the University of Maryland's policies.

Academic Integrity – Ethical work habits are critical for your professional success. I am aware of the pressures and opportunities that you have to copy/cheat and while I and the iSchool want to be supportive of those students who are encountering difficulties and/or make unintentional errors, we take this seriously and will be actively looking for and responding to incidents of

plagiarism and cheating. Thus, cases of academic misconduct will be referred to the Office of Student Conduct irrespective of scope and circumstances, as required by university rules and regulations. Visit <http://osc.umd.edu/OSC/Default.aspx> for more information about academic integrity.

Special Needs — Students with disabilities should inform me of their needs at the beginning of the semester. Please also contact the Disability Support Services (301-314-7682 or www.counseling.umd.edu/DSS). DSS will make arrangements with you and me to determine and implement appropriate academic accommodations. Students encountering psychological problems that hamper their course work are referred to the Counseling Center (301-314-7651 or www.counseling.umd.edu) for expert help.

Learning Assessments

Discussion Forum Participation (10%): Participation is a vital component of this course. You are expected to participate by posting to a weekly discussion forum. You will either be asked to respond to a discussion question that I post or to post your own original question about the readings. Your post is due by 11:59 PM on Thursdays. Please try to finish the readings and lectures for each week by Thursday night so that you're able to post a thoughtful comment. I recommend setting a calendar reminder about this. There will be no discussion forums on the weeks that exercises are due.

Please treat your fellow class members with respect in the online forums, just as they would in any face-to-face interaction. Visit www.albion.com/netiquette more details about etiquette in online communication.

Labs Participation (15%): You are expected to complete weekly lab assignments. These will involve different activities, including answering questions that I post and solving decision problems. You will generally be given full credit for completing the labs. These low-stakes assignments should provide you with an indication of your progress prior to the formal assessments (exercises, quizzes). Your lab assignments are due by 11:59 PM on Sundays. I recommend setting a calendar reminder about this. There will be no lab assignments on the weeks that exercises are due.

Exercises (40%): There will be four exercises. Each exercise will be graded on a scale of 0-10. They are due by 11:59 PM on the day that they are due. Due dates are indicated below under “Course Schedule.”

The week that each exercise is due, I will create an “Ask a Question Discussion” forum. If you have a question about the exercise that will benefit other class members, please post it to this forum. The TA will monitor the forum and try to respond to your questions.

Quizzes (25%): There will be four short quizzes to test your understanding of the concepts covered in the readings and lectures. They will be open book and open notes. We will drop your poorest quiz and the remaining 3 quizzes make up 25% of your grade. They are to be submitted

by 11:59 PM on the day that they are due. Dates for each quiz are indicated below under “Course Schedule.”

Case Study Report (10%): You will write a report in response to a case study about a decision that an individual or organization must make. The project deliverable is a written report (2-3 pages double-spaced). It should not exceed 1,000 words of text, excluding figures, tables, references, and appendices.

Collaboration

Here are specific guidelines about the forms of collaboration that are acceptable.

- Labs, Exercises, and Case Study: you may use your notes, consult the readings, search online, and work with other class members and in groups to figure out the underlying concepts and problem-solving processes, but are expected to work individually to answer the specific problems that are assigned.
- Quizzes: you may use your notes, consult the readings, and search online; however, you are expected to complete your own work, i.e. you may not communicate with other class members when completing these assessments.

Late Policy

You may turn in assignments up to three weeks past the due date for partial credit. No reason needs to be provided. Any late work must be turned in by the last day of class (May 14th). The penalties are as follows:

# days late	1	2-3	4-7	8-14	15-21
penalty	-5%	-10%	-15%	-20%	-30

For example, a grade of 90% on a homework assignment that this turned in 2 days late will be recorded as an 80%.

Letter Grades

Final letter grades are assigned based on the percentage of total assessment points earned. To be fair to everyone I have to establish clear standards and apply them consistently, so please understand that being close to a cutoff is not the same thing as crossing it (89.9 ≠90.0). It would be unfair to make exceptions for some and not others.

+	97.00%	+	87.00%	+	77.00%	+	67.00%		
A	94.00%	B	84.00%	C	74.00%	D	64.00%	F	<60.0%
-	90.00%	-	80.00%	-	70.00%	-	60.00%		

Course Schedule

‘R-1’, ‘R-2’,... ‘R-5’ refer to assigned readings that are shown below under “Readings.”

Wk	Date	Tuesday
1	Jan 28- Feb 1	Introduction and Course Overview; What is a “Decision”? Readings: RC Chapter 1 RC Chapter 2, p 23-26 <i>Discussion Forum 1</i> <i>Lab 1</i>
Module 1: Decision Analysis		
2	Feb 4-8	What is Decision Analysis?; Payoff Matrix Readings: R-1 (1 st half: p 803-817) R-2 (p 736 – 751) <i>Discussion Forum 2</i> <i>Lab 2</i>
3	Feb 11-15	Decision Trees Readings: RC Chapter 2, p 26-32 R-2 (p 751 – 753) R-3 <i>Discussion Forum 3</i> <i>Lab 3</i>
4	Feb 18-22	Decision Trees cont. Readings: R-2 (p 759 – 775) <i>Discussion Forum 4</i> <i>Lab 4</i> Exercise 1 and Quiz 1 posted on Feb 24
5	Feb 25- Mar 1	Considerations/Pitfalls in Decision Analysis Readings: RC Chapter 2, p 32-42 R-4 R-5 <i>Quiz #1 (due Thur Feb 28 by 11:59 PM)</i> <i>Exercise #1 (due Sun Mar 3 by 11:59 PM)</i>
Module 2: Decision Theories		
6	Mar 4-8	Utility Theory; Prospect Theory; and Decision Weights Readings: R-6 RC Chapter 11, p 237-241 RC Chapter 12 <i>Discussion Forum 5</i>

Lab 5		
7	Mar 11-15	Automatic vs. Controlled Thinking Readings: R-7 Exercise 2 and Quiz 2 posted on Mar 17 Discussion Forum 6 Lab 6
	Mar 18-22	<i>Spring break</i>
8	Mar 25-29	Heuristics Readings: RC Chapter 4 RC Chapter 5 Quiz #2 (due Thur Mar 28 by 11:59 PM) Exercise #2 (due Sun Mar 31 by 11:59 PM)
Module 3: Mathematical Techniques to Inform Decisions		
9	Apr 1-5	Optimization/Linear Programming Readings: R-8 Discussion Forum 7 Lab 7
10	Apr 8-12	Solving Optimization Problems in a Spreadsheet Video: https://goo.gl/AFcC7V Readings: R-9 R-10 R-11 Discussion Forum 8 Lab 8 Exercise 3 and Quiz 3 posted on Apr 14
11	Apr 15-19	Sensitivity Analysis Readings: R-12 Quiz #3 (due Thur Apr 18 by 11:59 PM) Exercise #3 (due Sun Apr 21 by 11:59 PM)
Module 4: Statistical Models to Inform Decisions		
12	Apr 22-26	Statistical Modeling; Data-Driven Decision Making; Models vs. Human Judgment Readings: R-13 RC Chapter 3, p 53-67 R-14

		<i>Discussion Forum 9</i> <i>Lab 9</i>
13	Apr 29- May 3	Classification and Decision Tree Models Readings: R-15 <i>Discussion Forum 10</i> <i>Lab 10</i> Exercise 4, Quiz 4, and Case Study assignment posted on May 5
14	May 6-10	Classification and Decision Tree Models cont. <i>Quiz #4 (due Thur May 9 by 11:59 PM)</i> <i>Exercise #4 (due Sun May 12 by 11:59 PM)</i> <i>Case Study Report (due Sun May 19 by 11:59 PM)</i>

If there are updates to the schedule, they will be posted to Canvas.
