

COLLEGE OF INFORMATION STUDIES

HCIM | MASTER OF SCIENCE IN
HUMAN-COMPUTER INTERACTION

2022 HCIM SUPPLEMENTAL APPLICATION

For your supplemental application, please select any **THREE** of the following five questions to answer. Copy the questions you choose into a single document, then answer each one in the space beneath in 150 words or less. Answer each separately, not as a single essay. Upload all three answers as a single document.

- Find a current job opening that you could see yourself pursuing upon completion of the HCIM degree. What is the job, and how will the HCIM program prepare you for it?
- Describe a situation when a professional superior assigned you a task that went against your personal code of ethics. How did you handle it?
- Tell us about a new technology you learned recently for your job or for school. What was your strategy for learning? What happened when you encountered something you didn't know?
- Describe a piece of design for technology or UX that you find especially influential or inspiring, and why it interests you.
- Describe a situation where you needed to research a problem, organization, technology, or product for completing a project. How did you go about finding that information? How did you confirm that it was accurate, and how did it influence your project?
